

Animal Health Monitoring Services

Where reliability meets reassurance

IDEXX **BioAnalytics**

Plan a health monitoring program specific to you.

Consult with our ACLAM accredited veterinarians for tailored solutions. Create customized testing panels for animal or environmental health monitoring, and quarantine solutions, designed specifically for your facility, species, and workflow.

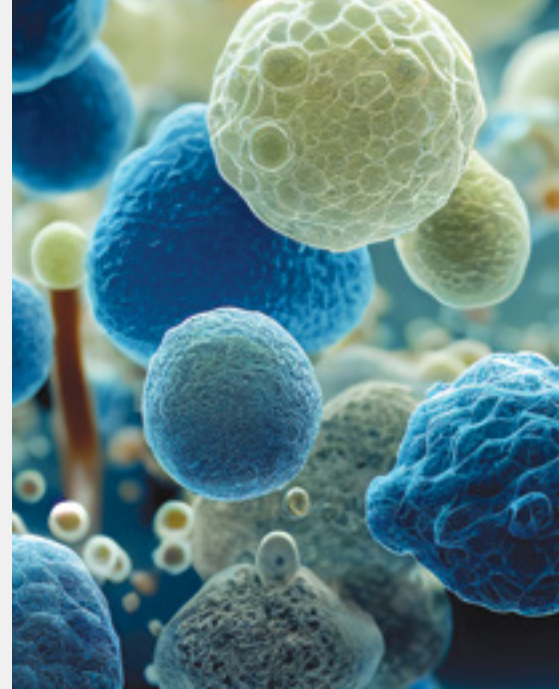

Prepare your samples for submission.

Simplified sampling with REPLACE™ and Opti-Spot®. Expect quick results, rigorous quality control, and flexible testing schedules without prebooking that ensure healthy animals for reliable research findings

Protect your facility from the unexpected.

Receive comprehensive support for unexpected events to safeguard people and unaffected animals. Personalized consultation with our scientists and pathologists help swiftly identify and address infectious and non-infectious causes of morbidity.

Trust in your results with a partner you can trust.

Solutions for every facility.

- + Environmental Health Monitoring
- + Aquatics Health Monitoring
- + Sentinel Health Monitoring
- + Quarantine Testing

Diagnostic Pathology

Histopathology evaluation by experienced veterinary pathologists for disease monitoring and morbidity analysis in every tissue and species.

Microbiology

Today's fastest and most accurate identification of microbes with MALDI-TOF mass spectrometry (MS) for a more complete microbiological profile.

Real-Time PCR

Simple. Precise. Fast. State-of-the-art organism detection for quarantine, colony, environmental, and biological testing solutions.

Serology

Opti-Spot® Dried Blood Spot sampling technology provides easy, fast, and accurate diagnostic results.

Microbiome & Germ-free Testing

Combining next-generation sequencing technology with metagenomics and bioinformatics tools, our microbiome analysis provides a convenient, cost-effective, and comprehensive picture of the animal's microbiome.

A support team focused on you.

Consultation

Benefit from complimentary consultation with ACLAM lab animal veterinarians for customized solutions specific to your facility needs.

Reporting

Timely results in PDF or CSV formats, FELASA reports, and health reports.

Questions

Your dedicated account manager will help you get rapid replies to requests and questions.

Logistics
