

# Stem Cells

Stem's the rules. The next cell therapy starts here.

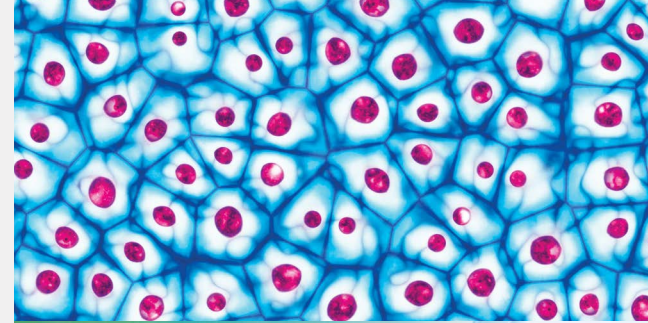

IDEXX **BioAnalytics**

# Your stem cells, your way. The possibilities are endless.

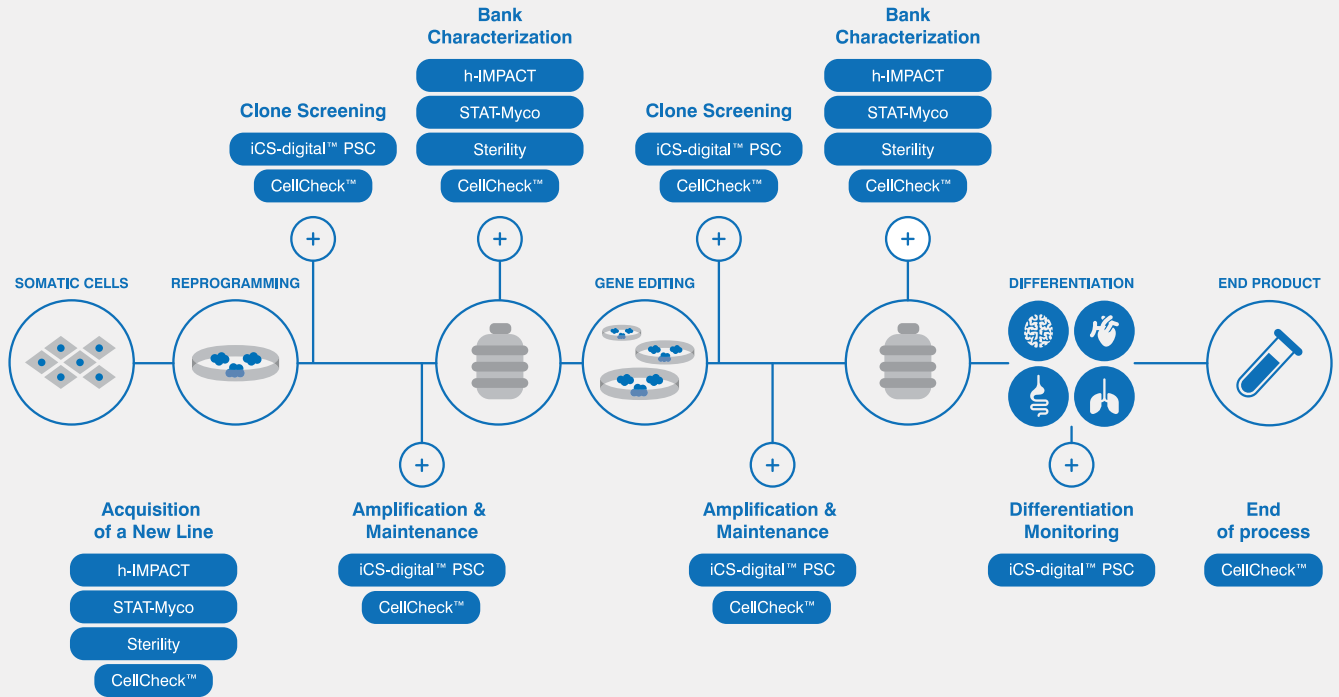

Human pluripotent stem cells are crucial for the creation of advanced models for researching disease pathologies, and developing innovative therapeutics that have the potential to revolutionize medical treatments.

Due to their inherent plasticity, the human pluripotent stem cells vital to your research are prone to changes and acquiring errors over time. To ensure your cell line identity is accurately and consistently maintained, it is imperative to meticulously catalogue genetic anomalies that may arise. Additionally, careful screening for potential contaminants is critical to maintain the integrity and reliability of your research or therapeutic development.

# Minimize effort. Maximize outcomes.

Our recommendation for testing at crucial milestone checkpoints.

# Breakthroughs are hard. Working with us isn't.

## 1. REQUEST A QUOTE

Connect with us for a personalized cell services quote.

## 2. PLACE YOUR ORDER

Create an account and submit your order in our online portal.

## 3. SHIP YOUR SAMPLES

Get step by step instructions to safely collect and ship your samples.

## 4. GET YOUR RESULTS

Once we receive your samples, we'll post the results in a matter of days.

Get connected to an experienced account manager and improve your cell health today.
